

Grayzel Remarks

Township Committee Meeting

8/15/2012

The Morris County Mosquito Extermination Commission regularly tests for mosquitoes carrying West Nile virus. Positive test were found several weeks ago in the areas around Martin Luther King Boulevard and Evergreen cemetery in Morris Township and Morristown. Just this morning county employees were out performing mosquito sprays in these areas as well as in the towns of Hanover, Montville and Florham Park.

There is a Mayoral appointment on the agenda this evening appointing Mr. Elliott Ruga to our Historic Preservation Committee. I think Mr. Ruga is very well qualified for this appointment, and I thank him for volunteering his time to participate in this Committee. I have known Mr. Ruga since for 12 years now since I first arrived in Morris Township when we were both living in Washington Valley, where historic preservation is very important for those residents.
